

Test Scenario ID:		TC-API-20		Version:	V1.1		
API Name:		Driver สร้าง Incident สำเร็จ		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องมี driverToken + passengerId					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
POST	/api/incidents	Authorization: Bearer {driverToken}, Content-Type: application/json	{ "type": "INAPPROPRIATE_BEHAVIOR", "title": "[TEST] ผู้โดยสารมีพฤติกรรมไม่เหมาะสม", "description": "...", "reportedUserId": "{passengerId}" }	201 Created	{ "success": true, "data": { "id": "...", "status": "PENDING" } }	✓	

Test Scenario ID:		TC-API-21		Version:	V1.1		
API Name:		type และ priority ถูกตั้งค่าถูกต้อง		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องสร้าง incident สำเร็จก่อน					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
POST	/api/incidents	Authorization: Bearer {driverToken}, Content-Type: application/json	{ "type": "INAPPROPRIATE_BEHAVIOR", "title": "[TEST] ผู้โดยสารมีพฤติกรรมไม่เหมาะสม", "description": "...", "reportedUserId": "{passengerId}" }	201 Created	{ "data": { "type": "INAPPROPRIATE_BEHAVIOR", "priority": "NORMAL" } }	✓	

Test Scenario ID:		TC-API-22		Version:	V1.1		
API Name:		Driver ดึงรายการ Incidents ของตัวเองสำเร็จ		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องมี driverToken + เคยสร้าง incident					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
GET	/api/incidents/me	Authorization: Bearer {driverToken}		200 OK	{ "success": true, "data": [...] }	✓	

Test Scenario ID:		TC-API-23		Version:	V1.1		
API Name:		มี incident ที่เพิ่งสร้างอยู่ในรายการ		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องมี driverIncidentId					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
GET	/api/incidents/me	Authorization: Bearer {driverToken}		200 OK	{ "data": [{ "id": "{driverIncidentId}", ... }] }	✓	

Test Scenario ID:		TC-API-24		Version:	V1.1		
API Name:		Driver ดูรายละเอียด Incident สำเร็จ		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องมี driverIncidentId					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
GET	/api/incidents/{driverIncidentId}	Authorization: Bearer {driverToken}		200 OK	{ "success": true, "data": { "id": "...", "type": "INAPPROPRIATE_BEHAVIOR" } }	✓	

Test Scenario ID:		TC-API-25		Version:	V1.1		
API Name:		มีข้อมูล reporter ครบ		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องมี driverIncidentId					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
GET	/api/incidents/{driverIncidentId}	Authorization: Bearer {driverToken}		200 OK	{ "data": { "reporter": { "id": "...", "username": "..." } } }	✓	

Test Scenario ID:		TC-API-26		Version:	V1.1		
API Name:		Admin อัปเดต Incident ของ Driver สำเร็จ (200)		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องมี driverIncidentId					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
PATCH	/api/incidents/admin/{driverIncidentId}	Authorization: Bearer {adminToken}, Content-Type: application/json	{ "status": "INVESTIGATING", "reason": "EVIDENCE_REVIEWED", "note": "กำลังตรวจสอบรายงานจากคนขับ" }	200 OK	{ "data": { "status": "INVESTIGATING" } }	✓	

Test Scenario ID:		TC-API-27		Version:	V1.1		
API Name:		Driver ดึง Notifications สำเร็จ (200)		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องมี driverToken + admin อัปเดต incident แล้ว					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
GET	/api/notifications	Authorization: Bearer {driverToken}		200 OK	{ "success": true, "data": [...] }	✓	

Test Scenario ID:		TC-API-28		Version:	V1.1		
API Name:		มี notification อัปเดตสถานะ incident		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		admin ต้องอัปเดต incident ของ driver แล้ว					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
GET	/api/notifications	Authorization: Bearer {driverToken}		200 OK	{ "data": [{ "type": "INCIDENT", "metadata": { "incidentId": "..." } }] }	✓	

Test Scenario ID:		TC-API-29		Version:	V1.1		
API Name:		Driver ดึง Incident Logs สำเร็จ (200)		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องมี driverIncidentId + มีการเปลี่ยนสถานะแล้ว					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
GET	/api/incidents/{driverIncidentId}/logs	Authorization: Bearer {driverToken}		200 OK	{ "success": true, "data": [...] }	✓	

Test Scenario ID:		TC-API-30		Version:		V1.1	
API Name:		Log มีข้อมูลการเปลี่ยนสถานะ		Tested by:			
Date of Test:		3/3/2025		Test Environment:		https://pai-num-nae-production.up.railway.app/api	
Pre-requisite:		ต้องมี log การเปลี่ยนสถานะแล้ว					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
GET	/api/incidents /{driverIncidentId}/logs	Authorization: Bearer {driverToken}		200 OK	{ "data": [{ "fromStatus": "PENDING", "toStatus": "INVESTIGATING", "reason": "...", "changedBy": {...} }] }	✓
