

Test Scenario ID:			TC-API-05		Version:	V1.1		
API Name:			ดึงรายการ Incident สำเร็จ		Tested by:			
Date of Test:			3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:			ต้องมี adminToken					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)		Remark
GET	/api/incidents/admin	Authorization: Bearer {adminToken}		200 OK	{ "success": true, "data": [...], "pagination": { "total": N, "totalPages": N } }	✓		

Test Scenario ID:		TC-API-06		Version:	V1.1		
API Name:		มี pagination ครบ		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องมี adminToken					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
GET	/api/incidents/admin	Authorization: Bearer {adminToken}		200 OK	{ "pagination": { "page": number, "limit": number } }	✓	

Test Scenario ID:		TC-API-07		Version:	V1.1		
API Name:		Filter ด้วย status PENDING		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องมี adminToken และ incident PENDING อยู่ในระบบ					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
GET	/api/incidents/admin?status=PENDING	Authorization: Bearer {adminToken}		200 OK	{ "success": true, "data": [...ทุก item status="PENDING"] }	✓	

Test Scenario ID:		TC-API-08		Version:	V1.1		
API Name:		อัปเดตสถานะเป็น INVESTIGATING สำเร็จ		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องมี adminIncidentId ที่ status=PENDING					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
PATCH	/api/incidents/admin/{adminIncidentId}	Authorization: Bearer {adminToken}, Content-Type: application/json	{ "status": "INVESTIGATING", "reason": "EVIDENCE_REVIEWED", "note": "กำลังตรวจสอบหลักฐาน", "priority": "HIGH" }	200 OK	{ "success": true, "data": { "status": "INVESTIGATING" } }	✓	

Test Scenario ID:		TC-API-9		Version:	V1.1		
API Name:		priority ถูกอัปเดตเป็น HIGH		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องมี token จากการ login ของ user ก่อนและ ต้องอัปเดต priority ใน request เดียวกัน					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
PATCH	/api/incidents /admin/ {adminIncidentId}	Authorization: Bearer {adminToken}, Content-Type: application/json	{ "status": "INVESTIGATING", "reason": "EVIDENCE_REVIEWED", "note": "กำลังตรวจสอบหลักฐาน", "priority": "HIGH" }	200 OK	{ "data": { "priority": "HIGH" } }	✓	

Test Scenario ID:			TC-API-10		Version:	V1.1		
API Name:			อัปเดตสถานะเป็น RESOLVED สำเร็จ		Tested by:			
Date of Test:			3/3/2025		Test Environment	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:			ต้องมี adminIncidentId ที่ status=INVESTIGATING					
Method	Endpoint		Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
PATCH	/api/incidents/admin/{adminIncidentId}		Authorization: Bearer {adminToken}, Content-Type: application/json	{ "status": "RESOLVED", "reason": "MATTER_RESOLVED", "note": "ตรวจสอบเสร็จ", "resolution": "ตรวจสอบและตัดเคสเรียบร้อยแล้ว" }	200 OK	{ "success": true, "data": { "status": "RESOLVED" } }	✓	

Test Scenario ID:		TC-API-11		Version:	V1.1		
API Name:		resolvedAt ถูกตั้งค่า		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้อง RESOLVED สำเร็จก่อน					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
PATCH	/api/incidents/admin/{adminIncidentId}	Authorization: Bearer {adminToken}, Content-Type: application/json	{ "status": "RESOLVED", "reason": "MATTER_RESOLVED", "note": "ตรวจสอบเสร็จ", "resolution": "ตรวจสอบและตัดเคสได้แล้ว" }	200 OK	{ "data": { "resolvedAt": "2026-03-02T..." } }	✓	

Test Scenario ID:		TC-API-12		Version:	V1.1		
API Name:		resolution ถูกบันทึก		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้อง RESOLVED สำเร็จก่อน					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
PATCH	/api/incidents/admin/{adminIncidentId}	Authorization: Bearer {adminToken}, Content-Type: application/json	{ "status": "RESOLVED", "reason": "MATTER_RESOLVED", "note": "ตรวจสอบเสร็จ", "resolution": "ตรวจสอบและตัดเตือนแล้ว" }	200 OK	{ "data": { "resolution": "ตรวจสอบและตัดเตือนแล้ว" } }	✓	

Test Scenario ID:		TC-API-13		Version:	V1.1		
API Name:		Reopen Incident สำเร็จ		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องมี token จากการ login ของ admin ก่อน					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
POST	/api/incidents/admin/{adminIncidentId}/reopen	Authorization: Bearer {adminToken}, Content-Type: application/json	{ "reason": "REOPENED", "note": "ต้องตรวจสอบเพิ่ม" }	201 Created	{ "success": true, "data": { "status": "PENDING", "id": "..." } }	✓	

Test Scenario ID:		TC-API-14		Version:	V1.1		
API Name:		มี parentIncidentId อ้างอิง incident เดิม		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้อง reopen สำเร็จก่อน					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
POST	/api/incidents/admin/{adminIncidentId}/reopen	Authorization: Bearer {adminToken}, Content-Type: application/json	{ "reason": "REOPENED", "note": "ต้องตรวจสอบเพิ่ม" }	201 Created	{ "data": { "parentIncidentId": "{adminIncidentId}" } }	✓	

Test Scenario ID:		TC-API-15		Version:	V1.1		
API Name:		revisionNumber เพิ่มขึ้น		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้อง reopen สำเร็จก่อน					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
POST	/api/incidents/admin/{adminIncidentId}/reopen	Authorization: Bearer {adminToken}, Content-Type: application/json	{ "reason": "REOPENED", "note": "ต้องตรวจสอบเพิ่ม" }	201 Created	{ "data": { "revisionNumber": 2 } }	✓	

Test Scenario ID:		TC-API-16		Version:	V1.1		
API Name:		ดึง Notifications สำเร็จ		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องมี passengerToken + admin อัปเดต incident แล้ว					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
GET	/api/notifications	Authorization: Bearer <token ของ user>		200 OK	{ "success": true, "data": [...] }	✓	

Test Scenario ID:		TC-API-17		Version:	V1.1		
API Name:		มี notification ประเภท INCIDENT		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		admin ต้องอัปเดต incident แล้ว → ระบบสร้าง notification					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
GET	/api/deletion /cancel	Authorization: Bearer {passengerToken}		200 OK	{ "data": [{ "type": "INCIDENT", ... }] }	✓	

Test Scenario ID:		TC-API-18		Version:	V1.1		
API Name:		Negative: Passenger เข้า Admin API ไม่ได้		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องมี passengerToken					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
GET	/api/incidents/admin	Authorization: Bearer {passengerToken}		403 Forbidden	{ "success": false }	✓	

Test Scenario ID:		TC-API-19		Version:	V1.1		
API Name:		Negative: Status transition PENDING → RESOLVED ถูก reject		Tested by:			
Date of Test:		3/3/2025		Test Environment:	https://pai-num-nae-production.up.railway.app/api		
Pre-requisite:		ต้องมี reopenedIncidentId ที่ status=PENDING					
Method	Endpoint	Header	Request Body	Expected Status	Expected Response	Test Result (Pass/Fail)	Remark
PATCH	/api/incidents/admin/{reopenedIncidentId}	Authorization: Bearer {adminToken}, Content-Type: application/json	{ "status": "RESOLVED", "reason": "MATTER_RESOLVED", "note": "พยายามข้ามขั้นตอน" }	400 Bad Request	{ "success": false, "message": "Invalid status transition" }	✓
